About the Master of Science in Applied Data Analytics

Legacy of excellence

Queen Mary University of London (QMUL), which dates back to the foundation of London Hospital Medical College in 1785, counts nine Nobel Laureates amongst its alumni and staff.

Expert faculty

In this programme, you'll learn from expert academics

and a wide range of experts, as well as Fellows of the Alan Turing Institute, and more.

Emphasis on applied skills

Your focus will be on learning analytics software and techniques that you'll be able to use directly in industry. Examples of what you will learn on this programme include Machine Learning skills using the Python programming language and the fundamentals of modern time series analysis.
